

ACKNOWLEDGEMENTS

The ISDR Secretariat gratefully acknowledges the many individual and institutional contributions for the global review of disaster reduction initiatives received from around the world.

The material in this review was drawn from special ISDR studies carried out by regional partner organizations, solicited inputs from UN agencies, experts and individuals, and from publicly available information. In addition, a questionnaire was circulated by the Secretariat to all countries for self-assessment of their institutional and policy development, risk assessments and planning for disaster risk reduction. Valuable contributions were also made by members of the Inter-Agency Task Force on Disaster Reduction. Additional contributions have been provided by participants in the on-line debate, held in preparation for the World Summit on Sustainable Development, organized by the NGO network Multi Stakeholder Forum for Our Common Future and the ISDR Secretariat during May, 2002 (see: www.earthsummit2002.org).

An Advisory Panel comprising experts from around the world (see below) met twice to provide guidance for the preparation of the report.

Funding

Special appreciation is extended to the Government of Japan, the Asian Disaster Reduction Center (ADRC) and the World Meteorological Organization (WMO) who kindly contributed funds and resources for the realisation of this project. Additional ISDR resources were drawn from contributions received from the Governments of Austria, Cyprus, Denmark, Finland, Germany, Iceland, the Philippines, Sweden, Switzerland and the United Kingdom, and from the World Bank.

Regional contributors

- Central America: *Coordination Center for the Prevention of Natural Disasters in Central America (CEPREDENAC)*, with supplementary input from North America
- Andean nations: *Andean Development Corporation (CAF) Disaster Prevention Programme (PREANDINO)*, with supplementary input from South America

Individual contributors

The ISDR Secretariat thanks all those individuals, country and agency representatives who have provided contributions or comments and who have helped in reviewing the current preliminary text of this review. The list is long and not all are mentioned by name. Special thanks are extended to Kenzo Oshima, UN Under-Secretary-General for Humanitarian Affairs, whose encouragement and support throughout the process have been very valuable, and to Professor Denis Martin Benn, former interim Director of the ISDR Secretariat, who launched the idea of a global review on disaster reduction initiatives in 2001.
